

Mock Interviews

A **Mock interview** was organized at BCIT; Mock interview is an emulation of a job interview used for training purposes. The conversational exercise usually resembles a real interview as closely as possible, for the purpose of providing experience for a candidate. It can help a job applicant to understand what is expected in a real job interview, and can help an applicant to improve his or her self-presentation. Mock interviews can be videotaped; the candidate can view the tape afterward, and get feedback. There are coaches who can provide feedback on aspects of the interview process. Mock interviews are most common for job interviews, but may also be used to train public figures to handle interrogations by journalists, as well as help candidates for office prepare for debates. Some organizations schedule mock interview events to help many students prepare for job. Many students participated in the Mock interview.

Debate Competitions/Communicative Activity

2.) **Debate competition** was organized at BCIIT, Debate is a process that involves formal discourse, discussion, and oral addresses on a particular topic or collection of topics, often including a moderator and an audience.

- .The main objectives of the Debate were.
- .Developing excellent oral and written communication skills.
- Developing their confidence level at a greater length.
- Developing effective tools for research, organization and presentation.
- Developing strategies to overcome fears of public speaking.Students are far more confident.

Confusion, uncertainty, and ambiguity make people uncomfortable and uncooperative. Making roles, responsibilities, and relationships clear gives everyone the information they need to do their jobs and to understand their contributions to the organization. Effective communication reduces the cost associated with conflicts, misunderstandings, and mistakes.

With this note.

3.) **Communicative activity** was organized BCIIT, The main objectives of the communication activity were.

- Effective communication shows respect and value of the other person.
- It helps us to better understand each other; not all communication is about understanding—some are intended to fight, dismiss, invalidate, undermine, etc.—but it should be!
- It makes us feel more comfortable with each other and encourages even more healthy and effective communication.

4.) Swot analysis was done at BCIIT, to make students realize their potential.

- Now students of BCA 5th and 3rd semester are able to write and read English paragraphs.
- They are able to give presentation.
- They are highly vocal and now are also able to articulate proper their messages in EnglishLanguage.
- They are more confident now.
- They are now been groomed then they were before. 6. Their overall communication has also been improved.

A SWOT analysis is more than just a business tool. It is a valuable developmental exercise that can be utilized to reflect, identify, and evaluate one's own personal or professional goals. It can also be helpful for job seekers who are looking for new opportunities and those who are looking to climb the career ladder.

The whole class was involved.

5.) Presentation was organized at BCIIT.

Presentation skills are one of the essential skill sets for students in institutions of higher learning. To help them improve their presentation skills, students are encouraged to use systematic methods to facilitate their presentations in the classroom. The main purpose of emphasizing presentation skills in higher education is to help develop professionalism in the learning environment. In this era of technological advancement, students can enhance their presentation. with this note, all of the students participated in the presentation.

Soft Skills Workshop/Role Play/Quiz

6.) A workshop on Professional values and Ethics was also organized at BCITT

The main objective of this presentation was to make students professionals in their respective fields.

All the students became aware of how professionalism is very important in life.

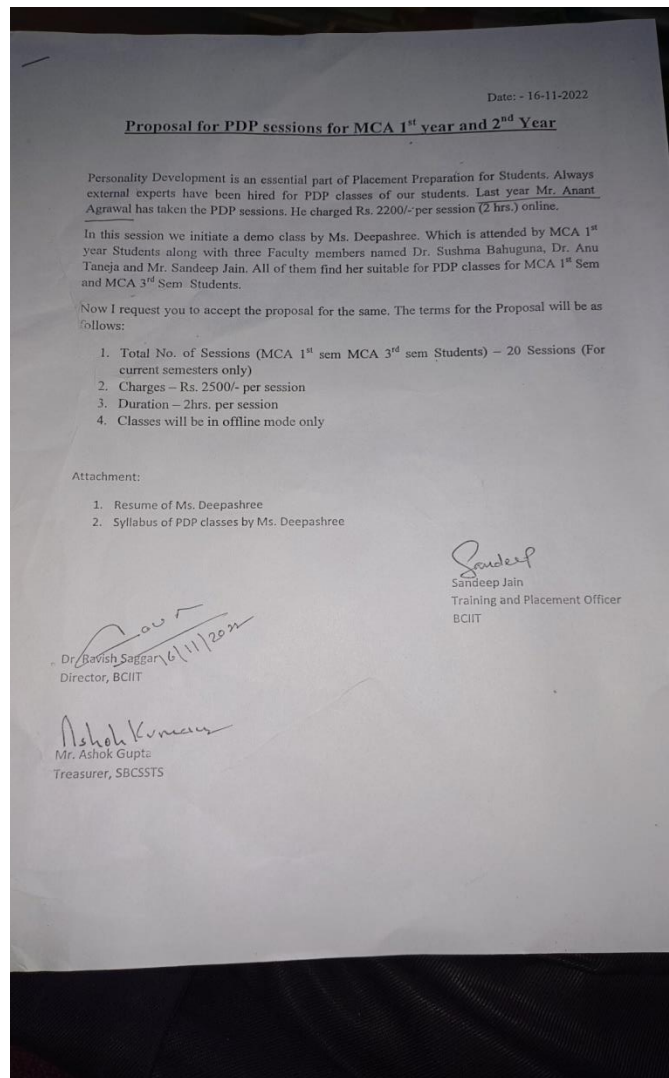

7.) The Role play activity was also organized with the students at BCITT, they were given many roles to play, For example going to a restaurant, or Banks, playing the role of customers as well.

The benefits of role playing among kids are fundamental in enhancing skills required for healthy development. It is no wonder child therapists use role play therapy to help children going through difficult situations and even to treat conditions such as autism.

Along with being fun, using imagination in their play improves their creativity and promotes better performance in school and it also helps them develop a strong problem-solving approach in dealing with issues. This is because it allows them to take up characters that act out real life Roles.

8.) The Quiz competition was also organized at BCIIIT. Quiz competition is to evaluate the knowledge of the participants within academics as well as beyond academics and to make them familiar with the prospects of quizzes and the objectivity of the questions. With practicing quizzes, students can do critical thinking, and get into a habit of innovative learning. These quizzes integrate the game mechanics into the learning process, they help students understand the weaker areas. Quizzes help students identify what they know and what they don't know.

Language Lab / Workshop

Our Language Lab software (English) is designed to help learners improve their language skills by providing various features and tools. The software offers a range of interactive exercises and activities that can help learners improve their language comprehension and many things, This software focus on reading skills, Listening skills and reading skills.

1. Today Listening activity was accomplished by using Language Guru at BCIIT.

Students enjoyed allot in the session.

And the overall Listening skills were improved upon of theirs.

Language laboratory is an audio-visual installation used in modern teaching methods to learn the foreign languages. Perhaps the first lab was at the University of Grenoble. In the 1950s up until the 1990s, they were tape based systems using reel to reel or (latterly) cassette. But the current installations are generally multimedia computers. The language lab is a technological break for imparting skills in English. The language lab offers an exclusive result oriented and efficient to enrich the English language learning process. The multimedia based language lab helps to learn and enhance the language proficiency by sharing the course materials with in a second where the teacher and the students involved effortlessly. The language lab is developed on the methodology of LSRW skills.
